Worldwide Operations

Aker Qserv has a wide range of first class equipment and the right personnel available for deployment around the world with experience in many different geographical locations. Aker Qserv is headquartered in Aberdeen and has facilities in the UK, Norway, Asia and West Africa to support worldwide operations.

Track record

Aker Qserv can demonstrate a sound track record in performing well intervention, process, pipeline and associated services with a focus on maximum operational uptime and exemplary safety performance.

Aker Qserv fully understands the criticality of operations in relation to efficient job execution where timing, efficiency and safety are paramount. Without these vital factors our clients cannot meet their targets and objectives. Aker Qserv believes that by ensuring our clients achieve and exceed their objectives, Aker Qserv can in turn meet our own in a similar nature.
