

Continuous Flowmeter Spinner

TECHNICAL INFORMATION:

- Output 10 pulses/rev.
- Max pressure 1035 bar / 15 000 psi
- Max temperature 177°C / 350°F
- Threshold Approx 0.03 m/s / 5 ft/min
- Max fluid velocity > 12.7 m/s / 2500 ft/min
- Measure point 2.5" from the bottom of tool
- Diameter available 1 11/16", 2 1/8", 3 1/8"
- Length 20.3 cm / 8" *
- Weight 0.77 kg / 1.7lb *
- Materials Corrosion resistant throughout

* Dependant on model

APPLICATIONS:

- Production profiling in tubing across sliding side doors
- Offers better protection in wells known to have debris
- Logging inside sand/slotted liners
- Injection monitoring

COMMENTS:

- Memory and/or surface read out available
- Special heads to customers specification
- Simultaneous operations with other PLT tools
- Interchangeable with CFB Mechanical Section
