

Production Gamma Ray PGR020

TECHNICAL INFORMATION:

- Diameter 1 11/16"
- Length 56.6 cm / 23,1"
- Weight 4.3 kg / 9.4 lbs
- Pressure 1035bar / 15 000 psi
- Temp. rating 177°C / 350°F
- Measure point 13.4 cm / 5.3"
- Accuracy <10% - Depends on Statistics
- Deadtime Negligible
- Sensitivity 1 count per API
- Threshold 20 keV

APPLICATIONS:

- Lithology identifications
- Depth correlations
- Identification of radioactive scale
- Tracer monitoring
- Gravel Pack Monitoring (with addition of gamma source)

COMMENTS:

- Memory and/or surface read out available
- Corrosion resistant throughout
- Sodium Iodide (NaI) scintillation crystal
- Special heads to suit customer specifications
- Runs in combination with other Sondex tools (e.g. MIT)
